DENKACARE

Vitalstart

THE COLOSTRUM ENHANCER FOR CALVES

Vitality

Young animals are vulnerable and therefore need extra care. After all, a healthy start is the basis of a healthy future! As a specialist in feed for young animals, Denkavit introduced the Denkacare line.
Denkacare products are health supportive products that support the wellbeing and development of the young animal.

VITALSTART

Dried bovine colostrum for an optimal start

- Real, dried bovine colostrum
- High concentration IgG: minimum 18.8%
- Rich in natural occurring components
- Contains extra vitamins and selenium to support health
- Guaranteed free of BHV1-antibodies and other diseases

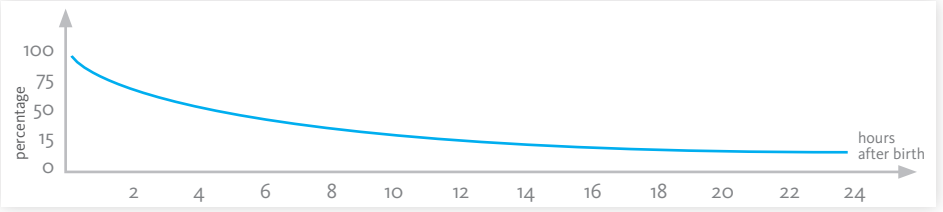
'Dried bovine colostrum for an optimal start'

A HIGH HEALTH STATUS IS THE BASIS OF A GOOD START OF LIFE. CALVES ARE BORN WITHOUT ANTIBODIES AND THEREFORE NEED THE PROTECTION OF COLOSTRUM. A HIGH CONCENTRATION ANTIBODIES (IGG'S) IN THE CALF INCREASES THE SURVIVAL RATE CONSIDERABLY. SUPPLEMENTING COW'S COLOSTRUM WITH A HIGH QUALITY COLOSTRUM POWDER TO INCREASE QUALITY IS ESSENTIAL FOR A GOOD START.

Absorption capacity of IgG's

The calf's capacity to absorp antibodies reduces quickly after birth. After 6 hours the absorption capacity is already reduced to 50%, see figure 1. Therefore it's very important to feed the calf in the first hours of life enough colostrum with a high quality.



DENKACARE	ACTION	OBJECTIVE	APPLICATION	STAGE	DOSAGE
Vitalstart	Contains a high concentration IgG's **(>18.8%)** for an optimal start	Supports the calf by supporting the immune system	Colostrum or milk (42-45 °C)	1st feeding as soon as possible after birth. 2nd feeding within 6 hours after the 1st feeding	*Colostrum enhancer:* > 21 = good Brix value: 20 = 30 gram per L 19 = 60 gram per L 18 = 90 gram per L
					Standard: 30 gram Vitalstart per L colostrum
					Colostrum replacer: 400 gram per 1.5 L milk
