DENKACARE
Humigut Liquid

HUMIC ACIDS TO SUPPORT INTESTINAL HEALTH

Young animals are vulnerable and therefore need extra care. After all, a healthy start is the basis of a healthy future! As a specialist in feed for young animals, Denkavit introduced the Denkacare line.
Denkacare products are health supportive products that support the wellbeing and development of the young animal.

HUMIGUT LIQUID

V502

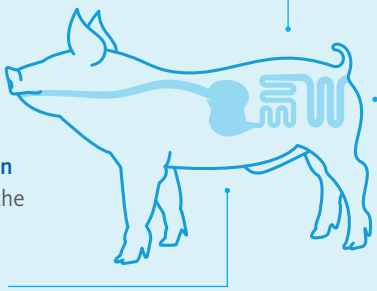
Pig farmer Marc van Erp: "The fact that Humigut Liquid can be fed in piglet milk is very convenient. Now I can feed piglet milk even though I have some infection pressure."

Humigut Liquid consists of humic acids, these humic acids were formed through "humidification" during the degradation process of biological material. Humic acids are therefore part of the natural diet of wild living animals. Providing animals with Humigut Liquid will contribute to improved intestinal health and function.

THE BENEFITS OF HUMIGUT LIQUID

Easy to use
Easy to apply in piglet milk replacer

Digestion support
Humic acids support the intestinal barrier and promote a healthy gut microbiome



Support detoxification
Humic acids support the natural detoxification functions in the gut

Faeces
Has a positive influence on faecal consistency

EXTRA TIPS WHEN USING HUMIGUT LIQUID

- Please shake the product before use.
- When using 10 litre jerrycan, please use tap.
- Clean the bowls after use.
- Start as soon as you give piglet milk replacer, the sooner the better.
