

GROWING TOGETHER WITH DENKAVIT

Growing together is the motto of DenkaVIT. On a daily basis, nutritionists, researchers and farmers worldwide have a task to secure a healthy growth of animals. They do not need to manage this on their own. We support them with the knowledge and the products which are required to achieve that goal. Not only now, but also in the long term. That is why we continuously search for new products, concepts and applications of raw materials and additives. Knowledge which also assists you to keep on growing.

BUILDING GUT RESISTANCE

NEW

DENKACARE
Humigut Liquid

Humigut Liquid is a unique standardised composition of humic acids from natural origin. Humigut Liquid builds on the knowledge of Humigut. Humigut is a high quality product, based on more than 60 years of research and application experience. Providing animals with Humigut will contribute to improved intestinal health and function.

THE BOWEL BOOSTER FOR PIGLETS AND CALVES

Humigut Liquid consists of humic acids, these humic acids were formed through “humification” during the degradation process of biological material. Humic acids are therefore part of the natural diet of wild living animals. Providing animals with Humigut Liquid will contribute to improved intestinal health and function.

Denkavit collaborates with GITES, an expert in the field on research and application for over 60 years, conducting over 70 research trials.

‘The advanced formulation of humic acids in Humigut Liquid is designed to support the development and maintenance of optimal intestinal health and gut function.’

ADDED VALUE OF HUMIGUT LIQUID PER SPECIES

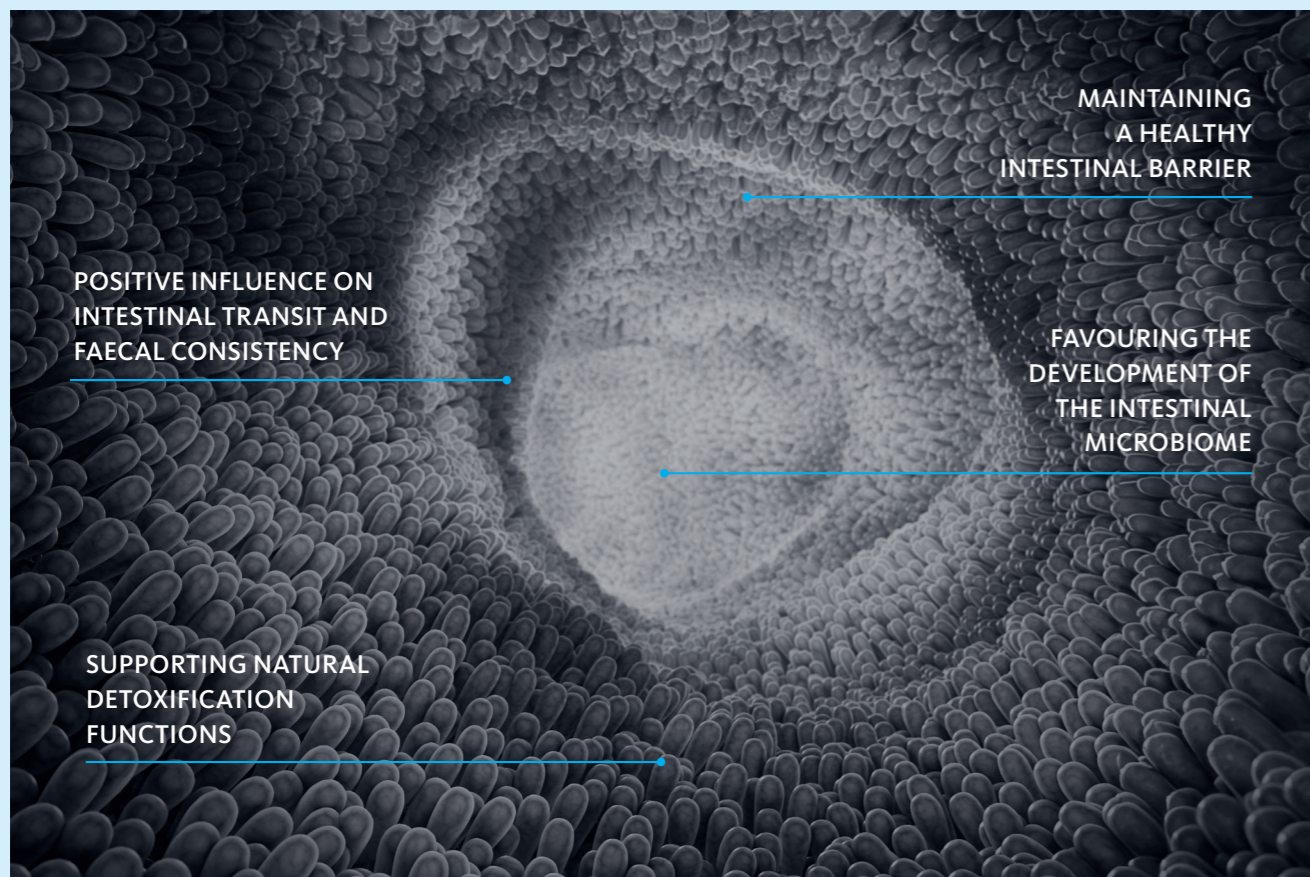

- Easy to apply in piglet milk replacer
- Helps maintain a healthy intestinal barrier
- Promote favourable microbiota in gut
- Supports natural detoxification in the gut
- Positive influence on faecal consistency

APPLICATION OF HUMIGUT LIQUID

Humigut Liquid is a black-coloured solution, available in 10 l jerrycans or in 1 l bottles. Basic component is leonardite, which is listed in the EU feed material catalogue (Number 13.10.2). Humigut Liquid is applicable for calves and piglets. Dosage levels depending on animal and target between 10 ml. and 20 ml.

Extremely strict controls of the production process guarantee a secure and standardised high-quality product, ensuring that Humigut Liquid stands out in excellence.
