

# DECISION TREE

## Hydration support for calves

**Vitalrecover**

Provide the calf 2.3 oz. per 2 qt. of lukewarm (95-100° F) water with Vitalrecover in between milk feedings with a minimum of 2h interval. Continue monitoring calf's condition. Vitalrecover should be provided for a maximum of 3 days, or until the symptoms cease. Consult a veterinarian if the calf does not improve within 3 days.

**Access to good quality water**

Always provide calves with free access to clean drinking water. Pay close attention to the vitality of your calves and consult our specialists if you have questions.

**Vitalfort**

Provide the calf 2 oz. per 2 qt. of lukewarm (95-100° F) water with Vitalfort in between milk feedings with a minimum of 2h interval. Depending on the situation, Vitalfort can be given multiple times a day. Provide to all calves in your herd.

Please note that this decision tree is a general guideline. It is always best to seek advice from a veterinarian for specific situations and circumstances.
